

# KidZone Fall Programs

**Session 1: Sept 22-Oct 29**

**Session 2: Nov 3-Dec 18**

## Messy Art

Ages 2-6 with Parents  
Tuesdays 10-11:30, drop-in  
Teacher: Brooke Landis  
**FREE** with admission!

*Session 1: Drawing Media*

*Session 2: Clay Play*

Did you know that when children get messy and explore art materials freely they develop creativity, perception, problem solving, imagination, self-confidence, fine motor skills, hand-eye coordination, language skills, open-ended thinking, and observation skills! Who knew getting messy and having fun was so good for you?

Each week we will provide 3 open-ended art experiences that focus on the process of creating. Each class includes sculpture, painting, and a project. Projects will focus on a different kind of art material each 6-week session. Parents experience new discoveries with their child, get ideas for activities to do at home, and receive resources about child development.

## Messy Science

Ages 2-6 with Parents  
Thursdays 10-11:30, drop-in  
Teacher: Brooke Landis  
**FREE** with admission!

*Session 1: Splash, Freeze,  
Squish & Squeeze*

*Session 2: Bubbles, Light, &  
Colors Bright*

Young children are natural scientists. They wonder and experiment to learn about the world they live in. Children and their parents will freely explore hands-on science centers each week. Our open-ended activities let kids decide what to investigate and also allow a wide age range of children to experiment at their own level. Teachers help facilitate discovery and encourage experimentation to develop science skills.

Parents experience new discoveries with their child, get ideas for activities to do at home, and receive resources about child development. This is a drop-in program, arrive when you can and stay as long or as little as you want. Come experiment with us!

## Wonder Science

Ages 4-6 (kids only)  
Thursdays 1:30-2:30  
Teacher: Brooke Landis  
Cost: \$75  
(members get 20% off)

*Session 1: Wet & Goopy  
Wonders*

*Session 2: Colors & Chemistry*

Ever wonder if you could blow bubbles with your hands? How tall can you build a construction of cardboard boxes? Do you know what gak feels like? What happens when a marble goes down a curved ramp? How can you make a piece of paper fly? What do YOU wonder??

Children will explore 3 open-ended science activities each week and experiment to their heart's content. Kids will use science skills while freely exploring and making their own discoveries. Come investigate your wonders with us!

*Explorations include: goopy stuff like oobleck, gak and slime, polymers, the water table, ice, tornado tubes, insta-snow, and more.*

*Explorations include: Color mixing, cabbage juice chemistry, potions, bubbles, light and color, water colors, light table, water jelly crystals and more.*

## Family Play Labs

The whole family together  
Third Saturday of the month  
10:00 – 11:30am Drop-in  
**FREE** with admission!

This new program on weekends is for the whole family. Explore art, science and nature activities together. Come play and grow with us!

**Halloween Science** *October 18 - New Date!*

Glowing & goopy science centers

**Paper Making** – November 21

**Holiday Messy Art** – December 19
